-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group II, claims 16-18, in Paper No. 4 is acknowledged. It is noted that, from the response to restriction requirement, the Applicant mentions that "Applicant elect the claims of group II, claims 16-19, ...", the examiner believe that "19" is typical error of "18" since group II includes claims 16-18.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugita (US Patent No. 5,915,076).

Concerning claim 16, Sugita teaches a method for determining optical characteristics of a substrate to be printed on and adjusting color components of a desired color to compensate for the optical characteristics (Fig.1), the method comprising the steps of determining optical characteristics of a desired color (503), determining optical characteristics of the substrate to be printed on (501), and comparing the optical characteristics of the desired color and the optical characteristics of the substrate to be printed on (504) and adjusting the color components of the

desired color to compensate for the optical characteristics of the substrate to be printed on (507), (Abstract; col. 3, lines 18-65; col. 6, lines 12-63).

Concerning claim 17, Sugita further teaches the step of determining the optical characteristics for the desired color further comprises the step of determining the reflection spectrum of the desired color (col. 6, lines 12-16).

Concerning claim 18, Sugita further teaches the steps of determining the reflection spectrum of the substrate to be printed on and determining the surface reflection of the substrate to be printed on (col. 3, lines 18-35, lines 61-63).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Ott (US Patent No. 4,967,379) discloses a process for the ink control or regulation of a printing machine by comparing desired color to obtainable color data.

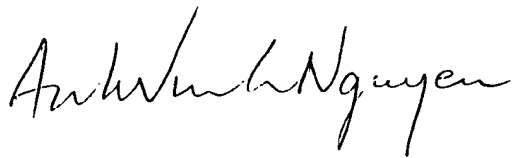

b. Utagawa et al (US Patent No. 5,650,863) teaches an image reading apparatus with means for adjusting the quantity of light.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Madeleine AV Nguyen whose telephone number is 703 305-4860. The examiner can normally be reached on 9:30-6:00.
